4th Annual Masterclass
XXI ESMO World Congress on Gastrointestinal Cancer
Thursday 4th July – Saturday 6th July, 2019, CCIB, Barcelona, Spain

Digestive Cancers Europe is proud to announce that its 4th Annual Masterclass will take place from the 4th - 6th of July 2019 in parallel to the ESMO World Congress on Gastrointestinal Cancer in Barcelona.

What started in November 2015 as a bi-annual event, became the Annual Masterclass with a growing number of participating countries and partners. The aim of the meeting is to provide the participants with a scientific up-date as well as some practical insights on how to better support the digestive cancer patient community in Europe.

The first day of the Masterclass will provide our audience with an update on new scientific insights and ongoing research in digestive cancers. On the same day, the First General Assembly of Digestive Cancers Europe will be held.

Friday will be dedicated to sharing best practices as well as developing ideas on how to provide better support and services to the digestive cancer patient community as well as understanding the issues around CRC awareness and screening. We will then also discuss the CRC patient pathway, with the unveiling of the results from the Survey on the Unmet Needs of Patients Living with mCRC.

The third day of the Masterclass will be devoted to other digestive cancers, with participation from the pancreatic and rare digestive cancer community.

We look forward to seeing you in Barcelona!
