

DIGESTIVE CANCERS EUROPE

Newsletter November 2018

An Exciting New Era Begins!!

Launched in October this year, Digestive Cancers Europe has many exciting new projects planned for the next 10 years with an aim to save an **additional 250,000 lives per year by 2028!**

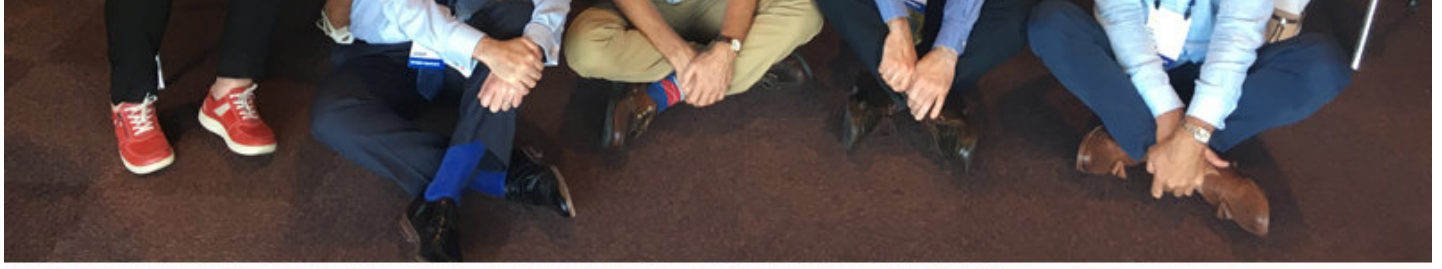

Whereas our work will continue to focus on colorectal cancer (under the banner of EuropaColon) we will also be expanding our work into other digestive cancers working with Pancreatic Cancer Europe, Eurorodis and Rare Cancers Europe.

As ever we will continue to work alongside our Member Groups and help them grow and flourish in the important work they do. We thank all our friends and colleagues for the help you have given us over the last 14 years and we look forward to your continuing support and partnerships.

We invite you to visit our new website with an exciting new portal called Living with Cancer; a DataMap with all the up to date statistics across Europe for colorectal cancer and much more www.digestivecancers.eu

The next 10 years will no doubt have their challenges but we are determined that by working in partnership with all key stakeholders we can achieve our goal of saving many lives from digestive cancers.
